Offenders Admitted to
Wisconsin Adult Correctional Institutions
Calendar Year 1980

HIGHLIGHTS

Admission Status: About 75 percent of all admissions were first admissions, representing 1,535 offenders. Males represented 94.9 percent of those first admitted or 1,456 persons, while 5.1 percent were females (79 offenders).

About 72 percent of the first admissions were offenders with a new sentence and were not probation violators. Another 20 percent were probation violators without new sentences. A small proportion, 6.4 percent, was reported as probation violators with new sentences.

All but 6 of the 377 readmissions (98.4 percent) were men. About 20 percent were parole violators without a new sentence; 36 percent were mandatory release violators without a new sentence; 14 percent, parole violators with a new sentence; and 29 percent, mandatory release violators with a new sentence.

Offense: Burglary was the most common offense category for first and readmitted men. Forgery was the most common offense among women. First admissions were made up of 31 percent person offenses (murder, assaults, robbery, etc.), 10 percent sex-related offenses (sexual assaults, sexual perversion, etc.), 6 percent drug-related offenses, and 50 percent property-related offenses (burglary, auto theft, arson, etc.).

Length of Sentence: Sentences of less than two years were received by 12.9 percent of total first admissions; of two years, less than three, by 23.1 percent; of three years, less than four, by 20.7 percent; of four years, less than six, by 22.2 percent; and of six years, less than life, by 21.1 percent. The median sentence was 40.4 months for all first admissions. The median for men was 40.5 months and for women, 29.8 months.

The average (mean) sentence was 56.1 months for all first admissions, men having a 57.1 month average and women, 39.1 months. (The average was computed after deleting data for offenders with an offense of first degree murder.)

Among readmissions, 2.9 percent received sentences of less than two years; 7.4 percent, two years, less than three; 13.5 percent, three years, less than four; 26.2 percent, four years, less than six; and 50.0 percent, six years, less than life. The median sentence was 72.0 months for men and 42.0 months for women. The average (mean) sentence was 99.4 months for men and 41.0 months for women.

County of Commitment: Milwaukee County accounted for 39.8 percent of all first admissions and readmissions in 1980 with 761 commitments (597 first admissions and 164 readmissions). By region, Milwaukee (Region III) accounted for 38.9 percent of the first admissions and 43.5 percent of the readmissions. Region I (Southern Region), containing 12 counties, accounted for 12.2 percent of the first admissions and 16.1 percent of the readmissions.

Region II (Southeastern Region), containing six counties, had 17.7 percent of the first admissions and 12.9 percent of the readmissions.

Region IV (Eastern Region), representing 17 counties, had 12.7 percent of the first admissions and 13.0 percent of the readmissions.

Region V (Western Region), representing 19 counties, had 8.3 percent of the first admissions and 7.5 percent of the readmissions.

Region VI (Northern Region), with 17 counties, had 10.2 percent of the first admissions and 6.7 percent of the readmissions.

Age: The majority of first-admitted men were under the age of 25, with 23.0 percent under 20 and 36.8 between 20 and 24. An additional 19.7 percent fell between the ages of 25 and 29. The 20 through 24 year category was the largest for women also, accounting for 34.2 percent of the first admissions. About 18 percent of the women were aged 19 or under, 16.5 percent were 25 through 29, and 15.2 percent were 30 through 34. Only 6.7 percent of those first-admitted and 12.2 percent of those readmitted were 40 or over.

About three-fifths of the readmitted men were 29 and younger with most, about 34 percent, 20 through 24 years, and 28.6 percent aged 25 through 29. About 15 percent of the readmissions were men aged 30 through 34.

The average (mean) age for first admissions was 25.3 for men and 27.4 for women. The average for readmissions was 29.4 for men and 30.8 for women.

Race and Ethnicity: Total first admissions were comprised of 60.5 percent Non-Hispanic White, 3.2 percent Hispanic White, 32.2 percent Non-Hispanic Black, 0.3 percent Hispanic Black, 3.5 percent Native American, and 0.3 percent Asian offenders. Whites (including 2.9 percent Hispanic) constituted 63.1 percent of the readmissions; Blacks, 36.4 percent; and Native Americans, 0.5 percent.

A larger proportion of the female first admissions was Non-White than reported for males (46.8 percent compared to 35.8 percent). Black women constituted 40.5 percent of the first admissions and 16.7 percent of the readmissions.

Marital Status: About 83 percent of first-admitted men were single. Of those, 65 percent were never married, 13 percent were divorced, 3 percent were separated, and about one percent were widowed. About 49 percent of the women were never married; 15 percent, divorced; 6 percent, separated; and almost 3 percent, widowed.

Among readmissions, 80 percent of the men and 83 percent of the women were single.

Grade Completed: About 44 percent of the first-admitted adults had completed high school or post-high school grades. Those completing ninth grade comprised 8.3 percent of the first admissions; tenth grade, 17.1 percent; and eleventh grade, 15.7 percent. The proportion of women who completed high school was lower than for men.

OFFENDERS RELEASED FROM

DIVISION OF CORRECTIONS ADULT INSTITUTIONS IN 1980

The report describes adult offenders who were first and rereleased from Wisconsin adult correctional institutions during calendar year 1980. Adult correctional institutions of release were Waupun Correctional Institution, Green Bay Correctional Institution, Dodge Correctional Institution, Fox Lake Correctional Institution, Kettle Moraine Correctional Institution, Taycheedah Correctional Institution, Oakhill Correctional Institution, Wisconsin Correctional Camp System, and Community Corrections Residential Centers.

Tables A, B, C, and D show trends in selected characteristics of adult releases during the past five years. The number of first-released and rereleased adult offenders (both males and females) fluctuated by as much as 8.4 percent from year to year and by 13.2 percent during the five-year period. Increasing from 1,411 in 1976 to 1,530 in 1977, the total number of releases dropped to 1,471 in 1978, rose to 2.9 percent to 1,513 in 1979 and rose 5.6 percent to 1,597 in 1980.

The reporting form for releases from adult correctional institutions was revised in November 1979. The information on work records, loss of privileges, lockups, and group counseling sessions was dropped and, henceforth, will not appear in the five-year comparisons.

Adult Male First Releases

As shown in Table A, the 1,235 adult male first releases in 1980 is the high for the five-year period. The low for the period was 1,115 in 1976 and the previous high, 1,194, was in 1977. The proportion of released men who had been committed from Milwaukee County rose to 44.3 percent, the highest level in the five-year period.

The median length of stay edged upward during the period, rising from 18.1 months in 1977 to 21.1 months in 1980. It rose by 1.2 months in 1978 and 1979 but only by 0.6 month in 1980.

Average (mean) lengths of stay ranged from a low of 22.7 months in 1976 to a high of 25.4 months in 1979 and 1980. The mean length of stay increased 3.7 percent in 1976, increased 2.2 percent in 1977, decreased 1.7 percent in 1978, increased 11.4 percent in 1979 and did not change in 1980.

Table A
Selected Characteristics for First-Released Adult Males
1976 - 1980

	Calendar Year				
Characteristics	1976	1977	1978	1979	1980
Total Adult Males First-Released	1,115	1,194	1,178	1,175	1,235
Average (median) length of stay, in months	18.7	18.1	19.3	20.5	21.1
Average (mean) length of stay, in months	22.7	23.2	22.8	25.4	25.4
Percent with Milwaukee County commitments	39.4	40.2	41.0	37.5	44.3

Adult Female Releases

The number of adult female first releases rose from 64 in 1975 to 84 in 1979 and dropped to 70 in 1980. The proportion of first releases from Milwaukee County ranged from 48.6 percent in 1976 to 53.6 percent in 1979. Median length of stay rose in 1980 to a five-year high of 18.4 months, 1.9 months longer than in 1979. The mean length of stay declined slightly in 1980 to 21.4 months from 21.7 months in 1979.

Table B
Selected Characteristics for First-Released Adult Females
1976 - 1980

Characteristics	Calendar Year				
	1976	1977	1978	1979	1980
Total Adult Females First-Released	72	80	70	84	70
Average (median) length of stay, in months	14.3	14.7	13.8	16.5	18.4
Average (mean) length of stay, in months	15.0	14.8	18.2	21.7	21.4
Percent with Milwaukee County commitments	48.6	50.0	48.6	53.6	52.9

First-Released and Rereleased Adult Males Compared

Trends during the five-year period of 1976-1980 for selected characteristics of first and rereleased adult males may be compared in Tables A and C. Table C shows that the percentage of male rereleases ranged from 15.8 percent in 1978 to 18.8 percent in 1980. Total males released rose from 1,334 in 1976 to 1,446 in 1977, dropped to 1,399 in 1978, rose to 1,420 in 1979, and rose to 1,521 in 1980.

Median length of stay for rereleased men dropped from 18.6 months in 1977 to 13.0 months in 1978, edging up to 15.4 months in 1979 and dropping to 12.2 months in 1980. The gap between the median length of stay for first releases and rereleases has widened from less than one month to about nine months.

Each year during the five-year period, a higher proportion of rereleased males were Milwaukee County commitments (average 47.4 percent) than first-released males (average 40.5 percent). However, the proportion of rereleases from Milwaukee County declined steadily from 1976 through 1979 and rose slightly in 1980.

Table C
Selected Characteristics for Rereleased Adult Males
1976 - 1980

Characteristics	Calendar Year				
	1976	1977	1978	1979	1980
Total Adult Males Rereleased	219	252	221	245	286
Percent rereleased of total adult male releases	16.4	17.4	15.8	17.3	18.8
Average (median) length of stay, in months	17.8	18.6	13.0	15.4	12.2
Average (mean) length of stay, in months	20.6	20.8	18.6	20.6	19.2
Percent with Milwaukee County commitments	51.6	50.8	45.7	44.1	44.8

First-Released and Rereleased Adult Females Compared

Five-year trends for selected characteristics of first and rereleased adult females may be compared in Tables B and D. Because fewer than 10 women were rereleased each year, their selected characteristics sometimes varied widely from year to year.

The proportion of rereleased females among total females ranged from a low of 2.8 percent in 1978 to a high of 9.7 percent in 1979. The total number of females released annually rose from 72 in 1978 to 93 in 1979 and dropped to 76 in 1980.

In each of the five years, the median length of stay of female first releases and rereleases was shorter than that of their male counterparts. The difference ranged from 2.7 to 13.3 months.

Table D
Selected Characteristics for Rereleased Adult Males
1976 - 1980

Characteristics	Calendar Year				
	1976	1977	1978	1979	1980
Total Adult Females Rereleased	5	4	2	9	6
Percent rereleased of total adult female releases	6.5	4.8	2.8	9.7	7.9
Average (median) length of stay, in months	4.5	N/A	N/A	5.0	6.0
Average (mean) length of stay, in months	5.4	18.2	6.0	12.9	8.8
Percent with Milwaukee County commitments	60.0	50.0	0.0	33.4	50.0

The set of 22 supplemental tables provides detailed information about adults released during calendar year 1980 from Wisconsin adult correctional institutions. Tables 6 and 9 contain details about rereleases only, Tables 21 and 22, first releases only, and the other tables, both first releases and rereleases.
